CONGRESS LOCATION: "PALAIS NIEDERÖSTERREICH"

The venue "Palais Niederösterreich" combines tradition and history in perfect harmony with all the requirements of the most up-to-date equipment. Palais Niederösterreich in the old Landhaus in the "Herrengasse", in the center of Vienna has had a very eventful history and has been lovingly renovated and restored following guidelines for the protection of historical monuments between 2002 and 2004.

VIENNA WAITS FOR YOU

Vienna is located in the very heart of Europe – making it easy to reach Vienna by plane, car or train. The tradition of Vienna as a major conference site dates back to the year 1815, when the city hosted the peace talks following the Napoleonic Wars ("Congress of Vienna").

In Vienna, tradition is not only on exhibit in museums but is a pulsing part of every-day life. Delegates to your meeting as well as accompanying persons will not be bored but will have a hard time choosing from the great variety of tours and activities that will be offered: such as half-day excursions in Vienna, full-day excursions to Vienna's surrounding areas, pre- and post-convention tours are at your disposal.

MEN'S HEALTH IN TRANSITION – FROM PRACTICE TO PREVENTION

The **International Society for Men's Health & Gender** takes great pleasure in inviting you to participate in the 5th World Congress on Men's Health & Gender in Vienna, Austria, on September 21st – 23rd, 2007.

This is the 5th time the congress will take place, the first time being in 1999. In those interim years the fields of Men's Health and Gender Medicine have grown and developed into scientifically accepted and socially relevant fields of medicine and public health.

It is with this trend in mind that a scientific program of highest quality presenting the new frontiers in Men's Health Care will be composed. Discussion and critical evaluation of the many new findings and advancements that have occurred in Men's Health and Gender Medicine are an important feature of the program. The sessions, which will include state-of-the-art lectures, panel and round table discussions and symposia, will provide an opportunity for all participants to exchange their professional experiences and their most recent research results in the field of Men's Health and Gender Medicine.

Health care providers can improve patient care and treatment outcomes by recognizing the basic medical differences between men and women. This congress is intended for a broad audience with multi-faceted interests, particularly clinicians and researchers from the areas of Urology, Internal Medicine, Geriatrics, Psychiatry, Endocrinology and Family Medicine. It will also be of interest for professionals from the Social Sciences.

We hope to see you among the participants in Vienna at what will be a unique and stimulating World Congress in an outstanding setting.

Sincerely,

Ray Rosen
President WCMH'07

Ian Eardley
Vice-President WCMH'07

Michael Marberger
Honorary President WCMH'07

Siegfried Meryn
General Secretary WCMH'07

Bob Djavan
Adjunct General Secretary WCMH'07
